

Brousseau Mountain

Parking and Trailhead are located just off of Route 114 on Brousseau Mountain Rd. It is about 1.2 miles to the summit. Situated just south of the Canadian border in the town of Norton, Brousseau Mountain (elevation 2723 feet) is a rugged little peak. A short, but scenic trail provides a pleasant hike to the summit where spectacular views can be had from the top of mountain's extensive southern tip climax.

Brousseau Mountain is one of the few nesting sites for Peregrine Falcons. This hike takes approximately 45 minutes to 1 hour, one way.

From Jackson's Lodge: Take 114 west about 5-6 miles. You will pass the white Lake View Averill Store on the right, then Averill Lake/Jackson Road on the left. Watch carefully as Brousseau Mountain Road comes up quickly on the left.
